We are giving you opportunity to be part of our continuous success, joining us on a position

## Junior Analyst for Use Case Modeling

### What You Will Be Doing?

You will be a part of defining and describing use cases for core insurance system and maintaining or keeping up-date the use case model and use case specification documents. You will participate in transforming user stories (business requirements) into use case model with consulting the business on optimum changes of the use case model and challenge the business requests.

You will participate in supporting development and maintenance of our IT system by verifying and approving the compliance between the use case model and provided solution and in supporting our new projects by providing use case models as a basis for comparing customer needs with existing solution.

You will also interact with our quality assurance team by providing them with use cases as subjects for further test cases and with users by providing use cases as criteria for acceptance.

### What You Need for this Position?

You need to have university degree in technical area - if it is computer or information technology science it will be advantage for you. It will be also advantage if you had experience in a similar role in software projects or in QA and if you are familiar with UML specification/have experience of using some UML tools and with insurance business area. You need to be fast learner, analytical, result oriented and pragmatically thinker in order to achieve expected goals.

### What's In It for You?

For the beginners in business analysis in our Use Case Modeling team, you will have opportunity to learn from strong professionals in this area and to upgrade fast your business and professional knowledge. Cooperating close with all interesting parties in process (technical and non-technical persons) you will acquire a broad picture about core insurance business processes which will be precious for your further career development.

If you want to give your career a new shape within one of leading insurance groups in Europe, we are looking forward to receive your application.

**Applications should be submitted to the e-mail address [jobs@sTech.rs](mailto:jobs@sTech.rs) (Subject: Junior Analyst for UCM).**

**Closing date: 01.10.2014.**

We thank to all candidates for their interest, however only short-listed applicants will be contacted.
