

We are Software Development Company acting within UNIQA International as the regional software services company. As leading insurance company in Austria and one of the largest insurance groups in Central and Eastern Europe, UNIQA is operating in 19 European countries providing safety in a changing world.

Achievements of IT department in Serbia were recognized by group headquarters and sTech is formed to provide software development services and to offer complete IT solutions to the UNIQA Companies in the region, as well as, on the group level.

We are giving you opportunity to be part of our continuous success, joining us on a position

## Junior Software Developer

### What You Will Be Doing?

You will develop, design and implement information system modules in one of our six teams.

You will be developing Web applications and other modules (MS Visual Studio), also designing database (MS SQL Server) using the best practice. You will be team member in developing core system for whole UNIQA Group.

### What You Need for this Position?

You need to be final year student or recently graduated in field of Information technology and to have basic programming skills in development of applications with Microsoft development tools (MS Visual Studio C#, ASP.NET; MS SQL Server; jQuery; Ajax ...)  
You also need to be fluent in English. We are looking for fast learners, who are result oriented, systematic and dedicated.

### What's In It for You?

We are pride on transparent, truthful, and sincere approach and our really great team spirit. Work in this setting is not limited to programming – here you gain valuable knowledge about nature and way of functioning of business in a large multicounty system. Our company is place where you can develop in a long-term period, and easily feel the contribution of your dedicated work in achieving long-term corporate goals.

If you want to give your career a new shape within one of leading insurance groups in Europe, we are looking forward to receive your application.
