Paid Intership in TeleTrader – Belgrade
Software Developer C++/C#

Within its **Market Data Server** department TeleTrader **is offering the following student internship opportunity:**

Main Tasks:
Working in a team which is developing and maintaining a distributed high performance server application. Guidance and instructions will be provided by a senior developer.

Requirements:
- Educated in the following areas (the more, the better)
    - C++
    - C#
    - Java
    - Ruby
- Good knowledge of algorithms, data structures and efficient programming
- Ability to effectively communicate and cooperate with peers
- Basic written and spoken English

We would be pleased to receive your CV and the possible start date.
Please send your application to olivera.bugarinovic@teletrader.com
