

About EyeSee

EyeSee is a cutting edge market research company that maximizes the effect of marketing communications with online eye tracking and facial coding. We have developed an innovative, online, webcam-based eye tracking platform to track people's eyes with their laptop and webcam at home. This innovative approach is faster (a few days), scalable (N and global) and more cost-effective (2-3 times) than conventional solutions which use specific hardware and software on a central location. Our experienced research team converts the obtained data into actionable insights.

EyeSee is based in Belgium, Serbia and the USA. We work for leading brands in the retail, FMCG, Telco and banking industries, as well as for leading market research agencies. Find out more at www.eyeseer-research.com.

If you believe that you comply with the terms, apply for the position:

DATA ANALYST ASSISTANT

Main responsibilities:

- Quantitative data analysis
- Data cleaning
- Project management – coordinating research studies globally
- Programming interviews & questionnaires

About you

The ideal candidate for this position is a highly-motivated self-starter with a strong drive to begin a professional career in the high tech research company. Applicants must be professional and articulate with keen desire to learn.

Basic Qualifications:

- Excellent English – most of our clients and respondents are native English speakers
- Bachelor's degree: statistics or mathematics related background
- Proficiency in Microsoft Office Package (Excel, Power Point)
- Knowledge of SPSS or similar
- Quantitative (numerical) reasoning
- Basics of programming and/or multivariate analysis would be a big bonus

To apply, please send your CV and application letter to bojan@eyeseer-research.com no later than March 25.
