

# PROJECTIFICATION AND SUSTAINABLE GOVERNANCE OF PROJECTS

April 26th 2021

06:00 p.m. - 07:30 p.m. (GMT+2)

Microsoft Teams

## Project

Sustainability principles have many applications in the field of project management. A large number of organizations aspire to be project oriented and bring higher value to the whole society. The main goal of the project is development of an international course in collaboration between University of Iceland, Vilnius University and University of Belgrade.

The project started in September 2020 and it will last for 36 months. During this three year period intensive course will be involved into study process of Master studies in partner universities. The course will be based on a variety of teaching methods and will address the management of project-oriented organizations and the sustainability aspect of project management.
