HEDWELL

AGILE PROJECT MANAGEMENT WITH FOCUS ON SCRUM

Introduction to the workshop

Faculty of Organizational Sciences, March 2022

Hedwell Story

" We are inspired by the power of **technology** and the potential of **talented individuals**. HEDWELL was founded to bring the best of both together and help organizations grow in the digital age.

THE HEDWELL CODE

MOVE BOUNDARIES

EMBRACE THE CHALLENGE

ASPIRE TO EXCELLENCE

BUILD TRUSTED RELATIONSHIPS

SETTLE FOR NO LESS THAN WIN-WIN-WIN

ENJOY THE JOURNEY

Hedwell Story

We are a **consulting** and **software engineering** company. Our team members help customers in their **digital transformation**. What does this mean?
It means we help them pick a software and/or a vendor, implement and go live with the product that replaces their legacy landscape or we help them create new products and platforms.

Developers at Hedwell work in agile teams, while consultants vary between agile or waterfall project implementations. In any case, each team member must be familiar with **agile principles**.

Hedwell Story

We started our journey **in 2020** with a group of industry and technology experts. Since then, we opened offices in **Germany**, **Serbia**, **India** and **Singapore** and **multiplied** the size of our team.

In November 2021, we became a part of **SAP Fioneer** – a leading global provider of financial services software solutions and platforms. Together, we aim to help customers innovate and transform their business by combining premier technology with development expertise and a broad ecosystem of partners.

What can you expect from this workshop?

Once you start applying for jobs, the chances are someone in the selection process will mention the word *"agile"*.

You've heard it before for sure, but do you know what it means?

In this workshop, we will explain the principles of agile methodologies by focusing on the most popular one – *Scrum*. Through game, case resolution and expert discussion, you will learn the most important theoretical information and practical skills to help you in your future career.

✓ **Everyone will receive a participation certificate.**

✓ **Workshop will be held in Serbian.**

Theory and tools

Game

Expert talk
