

Become a pioneer in environmental communication

ENVIRONMENTAL
COMMUNICATION

The specialized Online Programme on Environmental Communication empowers environmental communicators in all sectors of society – civil society, academia, media, business, and government. Environmental communication is a new practical discipline that integrates natural resources management and communication and journalism techniques. This non-degree programme is designed to be completed in six months, including 5 online courses and a final hackathon. The Programme is based on online collaborative learning and virtual mobility, is free-of-charge and is conducted in English language. The participants will obtain a certificate and ECTS credits.

Who can enrol in the programme?

All interested to participate in public environment protection discussions from diverse academic levels and backgrounds: students, educators, scientists, journalists, communication practitioners, CSOs and businesses representatives, public officials.
